

FOR IMMEDIATE RELEASE

WetStone Technologies Again Named “Hot Cybersecurity Company To Watch” in 2017 Fairfax, VA

WetStone Technologies, a wholly-owned subsidiary of Allen Corporation of America, and a global provider of innovative cyber security solutions for the digital investigator, announced it has again been ranked in Cybersecurity Ventures’ Cybersecurity 500 listing of the world’s top cybersecurity companies. The Cybersecurity 500 list recognizes the hottest and most innovative cybersecurity companies.

Cybersecurity Ventures recently announced their Q2 2017 Cybersecurity 500, a directory of the 500 hottest and most innovative cybersecurity companies to watch this year. According to Steve Morgan, founder and CEO of Cybersecurity Ventures, thousands of potential companies were considered by soliciting feedback from CISOs and end-user security practitioners and researching hundreds of security events and news sources. Companies were evaluated on their security market category, problems solved, customer base, feedback, VC funding, company growth and published reviews, among other factors. WetStone achieved a ranking of 415 in the Q2 list.

Cybersecurity Ventures publishes a new edition of the Cybersecurity 500 each quarter. The revised quarterly editions have new companies coming on the list, others dropping off, and changes to the listing order, to accurately reflect the current hottest and most innovative companies. For the complete list and more information about the Cybersecurity 500, visit <http://cybersecurityventures.com/cybersecurity-500/>.
